Hamburg Airport
PCA-Systems Hamburg Airport – ISTinox Hose Reels

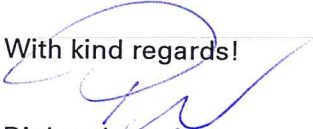

Dear Mrs. Zimmermann!

We would like to thank you for the pleasant and professional cooperation. The ISTinox PCA hose reels have been in operation at Hamburg Airport since December 2016 and function very good. During the entire project, we were able to rely on the competence and reliability of your company. With your know-how and experience you have supported us in all aspects of the project. Schedules were met without exception. In addition, we would like to emphasize your extraordinary flexibility. Even when short-termed project changes occurred, you have responded quickly and professionally and contributed significantly to a successful project completion. Also in the field of customer service your company is a reliable partner. The spare parts delivery (PCA hoses, couplings etc.) is guaranteed at any time.

We are very happy with the PCA hose reels. They are very practical and easy to use for the ground staff. Compared to the previous hose baskets, the PCA supply of the waiting aircraft can now be done much more efficiently.

We are happy to recommend you to potential clients without any reservations.

With kind regards!
